

Dear Family & Friends,

We can't wait for you to meet our precious new baby! While family is extremely important to us at any time of year, it is especially critical to help protect this newest member of our family during these critical first months when (s)he's especially vulnerable. Please help us keep our baby happy and healthy.

NO VAX, NO VISIT: Our newborn's immune system is new, too. The first gift we can give our baby is good health and we are asking for your cooperation. We ask all family and friends who plan to visit to make sure they are up to date on their vaccinations.

Please talk to your doctor about which vaccines you may require. Immunity wears off for some vaccines that you received in childhood.

If you can't or choose not to be vaccinated, they will be ready to meet you after being fully vaccinated at 6 months old.

Thank you for understanding.

For more information, visit okhealthyfamily.org.
